

## Press Release

### **New iPad app for mobile access to net-files data and project rooms**

**Available now: A free iPad app from net-files GmbH for customers who use its virtual data rooms.**

Burghausen/Germany, January 14, 2014 – To complement its web application, net-files GmbH has developed a new iPad app that provides mobile access to its data and project rooms. The app also supports offline file access.

Documents stored in net-files can be opened and read in the iPad app. Depending on users' authorization levels, documents can also be stored in the app and kept available for offline access when Internet connectivity is not available. Data security and confidentiality is guaranteed at all times by document encryption, password protection and the option of 2-factor authentication when users log in.

The net-files app is available now and can be downloaded free of charge from the Apple App Store. To do so, click this link: <https://itunes.apple.com/de/app/net-files/id775712076>

net-files gives companies secure data exchange and a secure online document management hub featuring elaborate access rights and the option of mobile access too. This cloud solution makes it easy for companies to exchange data securely with customers and suppliers. It also lets them set up secure data rooms for M&A projects, due diligence tests, asset transactions, board communication, property and contract management, for example.

## About net-files GmbH

With more than ten years' experience, net-files GmbH is one of the first and leading German providers of project and data rooms. The net-files cloud service ([www.net-files.de](http://www.net-files.de)), offers companies and distributed project teams a web-based application for online document management, secure file sharing and efficient collaboration.
