

Press Release

New version of netfiles Deal Room available

New deal room offers comprehensive Q&A workflow, data room status function and optimum support for mobile devices

Burghausen, December 1, 2020 – netfiles GmbH, one of the leading providers of virtual data rooms in Germany, introduces a new version of the due diligence data room netfiles Deal Room.

The new Deal Room provides a comprehensive Q&A workflow for managing questions and answers during the due diligence process, a data room status function and an optimized user interface to support mobile devices. The data room status feature allows the setup of the data room, including user accounts and uploading of documents in a preparation phase, during which external users have no access to the data room. Once preparations are complete, the data room can be opened and external users invited with a simple mouse click. In the new Q&A workflow, gatekeeper roles to channel and approve questions on the bidder and seller side can be defined. A new Q&A overview with extensive filtering and sorting options gives administrators quick control of the status of all questions.

The new netfiles Deal Room can be used very conveniently also on tablet computers for example the Apple iPad, and smartphones. The installation of an app is not necessary, a web browser on the mobile device is sufficient. In addition to the iPad app already offered, netfiles is now perfectly suited for accessing and working in the virtual data room while on the move.

About netfiles GmbH

netfiles GmbH was one of the first German providers of virtual data rooms. Almost 20 years of experience have established the company as a leading player in this field. netfiles enables businesses to securely share and exchange files and provides a central online document management facility secured by detailed access rights while allowing mobile access. In this cloud-based solution, data can be shared easily and securely within a company, a project team or with customers and suppliers. Secure data rooms can also be set up for applications such as M&A projects, due diligence audits, asset transactions, board communication, property management and contract management.

Companies can test the netfiles data room free of charge and without obligation for 14 days:
