

# Press Release

## Mobile app for netfiles data room now also available for iOS and Android smartphones

Burghausen, November 16, 2021 – In addition to the web application and a tablet app, netfiles GmbH now also offers an app for iOS and Android smartphones for accessing the netfiles data room on the go. The new app is based on state-of-the-art development and security technologies and offers users the possibility to open and read documents stored in the netfiles data room directly in the app on the smartphone. Depending on the user's access rights, the files can also be stored in the netfiles app, allowing offline access without an Internet connection. Document encryption, password protection and optional 2-factor authentication at login ensure the security and confidentiality of the data.

The netfiles app is available for download from the Apple App Store and Google Play Store at the following links:

## About netfiles GmbH

With more than 20 years of experience, netfiles GmbH is one of the first and leading providers of virtual data rooms. netfiles enables companies to securely exchange data and provide centralized, secure online document management with location-independent access and detailed read and write access rights. With the cloud solution, data can be easily exchanged within the company or with customers and suppliers and secure data rooms can be set up for due diligence and meeting management (board communication).

Companies can test the netfiles data room free of charge and without obligation for 14 days:
