## netfiles GmbH launches new product „netfiles Board Room“

### netfiles Board Room offers secure data room solution for efficient meeting management

Burghausen, September 30, 2021 – netfiles GmbH, one of the leading providers of virtual data rooms, is expanding its product offering with the new netfiles Board Room solution.

netfiles Board Room supports corporations, committees, local authorities, associations and societies in the efficient, secure and compliant preparation, execution and documentation of board meetings.

Agendas, meeting folders, minutes and decisions are created and stored directly in netfiles Board Room. Board members can securely access all meeting documents, edit and comment on documents, and exchange information with each other before, during, and after meetings, regardless of location. netfiles Board Room also includes a secure video conferencing function that can be used directly in the data room without installing additional software. All data is processed exclusively in secure, certified data centers in Germany.

"Data security, data protection and compliance are nowadays not only an issue for large companies but increasingly also for medium-sized businesses, small businesses, associations and the public sector. In addition, more and more meetings are taking place virtually, and not just since the Covid-19 pandemic. Many companies are therefore looking for a secure solution for their meeting management. Most of the solutions available on the market so far primarily address large corporations. With netfiles Board Room, we want to address primarily medium-sized businesses, smaller companies, associations and the public sector. Similar to our other products, netfiles Board Room is characterized in particular by its ease of use. This means that netfiles Board Room can be used quickly and efficiently by organizers, meeting participants and other stakeholders without any training," explains Thomas Krempl, CEO of netfiles GmbH.

## About netfiles GmbH

With more than 20 years of experience, netfiles GmbH is one of the first and leading German providers of virtual data rooms. netfiles enables companies to exchange data securely and provide centralized, secure online document management with detailed access rights and mobile accessibility. With the cloud solution, data can be easily exchanged within the company or with customers and suppliers and secure data rooms can be set up for due diligence and meeting management.

Companies can test the netfiles data room free of charge and without obligation for 14 days:
